ANALYTICAL CHARACTERISTICS

Alcohol (%): 13,50

Total Sugar (g/dm³): 0,6

Total Acidity (g/l AT): 4,9

PH: 3,59

VINTAGE CONDITIONS: 2016 was a year of extremes: a warm winter with high rainfall, at 618 mm twice as much as in an average year. After a wet spring, summer was very hot and dry, with some peaks of heat in August and September.

By the end of August, the harvest looked extremely good, in excellent sanitary condition, but ripening began to slow down due to the very hot and dry conditions.

Harvest began on the 5th September with the rosé and from the 7th with the ripest parcels.

Fortunately, 17 mm of much needed rain fell on 13th September, and maturation continued in ideal conditions from this point onwards. The main part of the harvest began on 19th September in dry and sunny weather, and the fruit continued to ripen throughout the harvest period. We were able to harvest each plot in ideal conditions as ripening continued.

In spite of the unusual and extreme climatic conditions of the year, the end result is of an excellent quality. The wines are balanced and fresh, very aromatic and expressive.

TASTING NOTES: This wine is a blend of the noblest of the classic Douro varieties: Touriga Nacional, Touriga Franca and Tinto Cao. Not as intense as the reserve wine but is very fresh and balanced with intense and bright fruit, wild spicy character supported by fine and elegant tannins. This wine expresses the delicate and balanced vineyards of Romaneira.
