The cultivated areas all face south or southwest and consist exclusively of different layers of slate rock. The winegrower focuses on naturalness, straightforwardness and the typical taste patterns of Moselle soils when developing his wines. Axel's wines are characterized by clarity, a crystalline characteristic, length and a great minerality.

Soil & Climate: Grey and blue slate, cool climate.

Vintage: July temperatures of up to 40 degrees Celsius and a water deficit of up to 210 litres per square metre: The summer of 2022 was relentless on the Moselle. This was felt above all by Riesling, the most important grape variety in the growing region with a harvest share of 61 percent, where the harvest began extremely early on 20 August. In view of the weather conditions, the winegrowers on the Moselle, Saar and Ruwer are talking overall about a good vintage with satisfying qualities and quantities. Light, aromatic and harmonious white wines as well as colour-intensive red and rosé wines are expected. The acidity levels are consistently low, and the alcohol content is described as moderate and in line with the market.
